

DevWindow::on\_btnCloseDB  
\_clicked

DevWindow::on\_btnInitDB  
\_clicked

DevWindow::enableButtons

```
graph LR; A[DevWindow::on_btnCloseDB_clicked] --> C[DevWindow::enableButtons]; B[DevWindow::on_btnInitDB_clicked] --> C;
```

The diagram illustrates a call relationship. Two source functions, 'DevWindow::on\_btnCloseDB\_clicked' and 'DevWindow::on\_btnInitDB\_clicked', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'DevWindow::enableButtons', which is shown in a gray box on the right.
